

# Preliminary Analysis: Converting Casual Members into Annual Members

Michael Szyszko

2023-12-21

## Preliminary Finding Summary

Generally, the most popular members stations do not match with the most popular casual stations. Further investigation is needed, however, based on the station names that include keywords such as “aquarium”, “planetarium”, “park”, suggest that casual riders may be using the service more for leisure relatively compared to member riders.

## Data Used in Preliminary Analysis

This preliminary analysis focused on internal data collected in Q1 of 2020 for member and casual rides during that period. Further analysis is needed to verify the findings for other quarters and years. There were suspicious entries that had very short and long trip durations that were excluded in this preliminary analysis that require further investigation. This does call into question the validity of the data given the amount of errors seen.

## Recommendations Based on Preliminary Finding Summary

- 1) Investigate potential membership benefits that could be bundled with local tourist attractions and leisure activities (e.g., member discounts for entry to the local aquarium).
- 2) Targeted marketing campaigns at the most popular stations for casual riders.
- 3) Investigate the feasibility of creating guided activities or interactive maps that could be offered to members.

## Including Plots

You can also embed plots, for example:

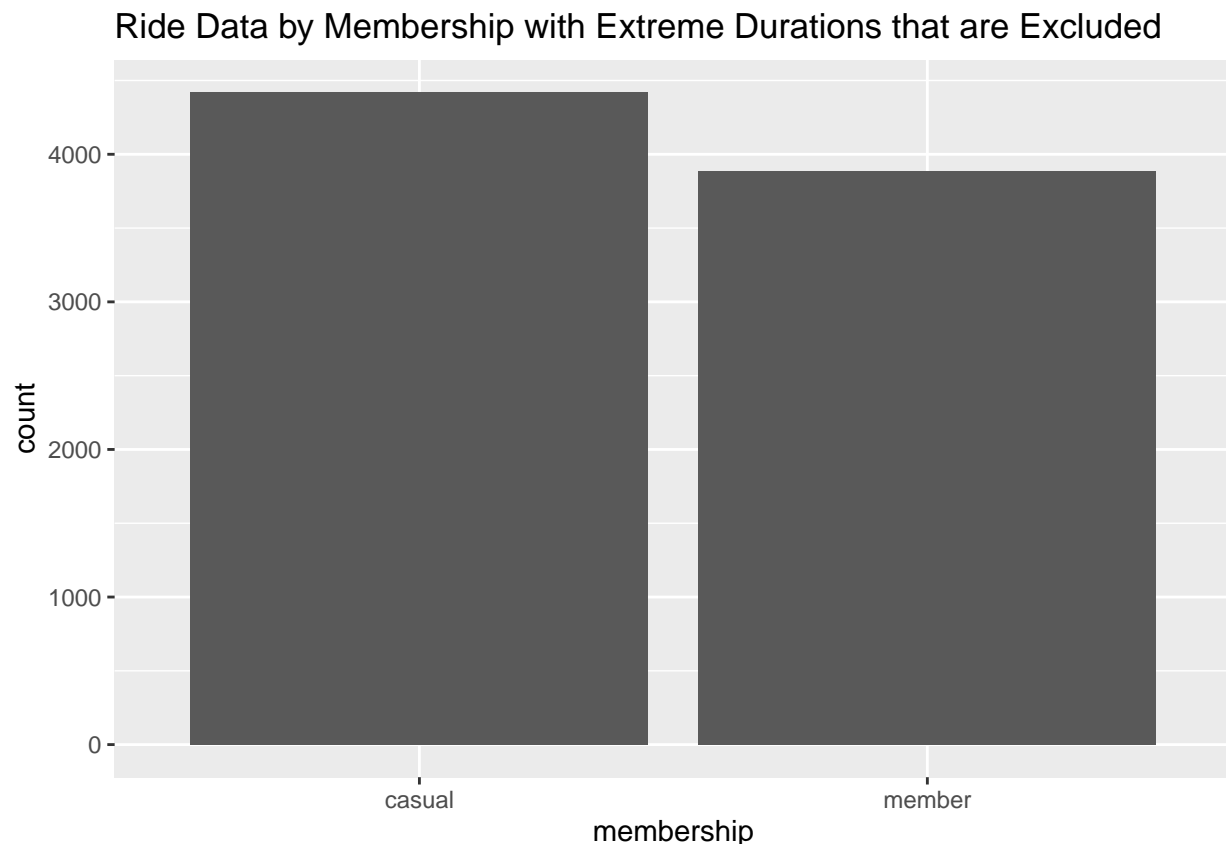

```
trips_2020_q1_membership <- trips_2020_q1 %>%
  rename(membership = member_casual)
trips_2020_q1_with_duration <- mutate(trips_2020_q1_membership, duration=difftime(ended_at, started_at,
trips_2020_q1_with_clean_duration <- trips_2020_q1_with_duration %>%
  filter(duration >= 1, duration <= 600)
trips_2020_q1_with_extreme_duration <- trips_2020_q1_with_duration %>%
  filter(duration < 1 | duration > 600)
head(trips_2020_q1)
```

There were rides that were very short and long (e.g., only a few seconds). It is likely that there are some data entry errors or system malfunctions. For the purposes of this analysis all extreme values, those below 1 minute and those above 10 hours have been removed. However, further investigation into why these values exist and if it may be also be impacting the remaining data being analyzed.
